# Enterprise Mobility Management (EMM)

Miradore

Benefits

- Secure data
- Enable BYOD/CYOD
- Control data usage
- Know your IT devices
- Automate and save costs
- Manage whole device lifecycle

Solution overview

Miradore EMM allows organizations to secure devices and their data, separate business and personal content, and deploy configurations and applications over the air to smart phones and tablets.

Feature	Specification
Secure	Enforce passcodes across all devices, remote lock and wipe.
Track Location	Stay up-to-date on your devices location all time.
Deploy Apps	Deploy any applications silently to your devices.
Deploy Configurations	Deploy configurations silently and choose from 100+ options to configure the device properly.
Set Restrictions	Lock down your device and apps to comply with your company needs.
Assign Business Policies	Let Miradore do the work and automatically deploy apps, files and configurations to your enrolled devices.

Miradore

Manage the Device Lifecycle

Feature	Specification
Purchase	Miradore provides basic IT Asset Management features to keep track of devices' purchase dates and warranty information included with device model, user and organization information. You can easily track devices that need to be replaced.
Enroll	Enroll the smartphones and tablets efficiently by choosing the best method suiting your requirements. Choose from methods like Apple Configurator, Android APK download, self enrollment, email and SMS. To fully automate the enrollment and pre-configuration of the device you can choose Apple DEP or Android Enterprise.
Configure and Secure	Configure the device to fully meet the user and company requirements. You may choose from 100+ configuration options and deploy any applications. Enforce the passcode and encryption to secure the device and data. Set up the secured container to separate business and personal data.
Maintain and Keep Updated	Keep your devices up-to-date with Over-The-Air (OTA) updates to applications and configurations. Utilize Apple VPP to keep control of your licenses. Miradore provides an overview of the devices' status and required updates with the assistance of a comprehensive dashboard. Ensure the devices are secured by the ability to remote lock and wipe.
Retire and Replace	Prepare the devices to retire by either unenrolling BYOD devices with selective wipe or completely wiping company issued devices. Plan the replacement with the help of complete inventory information of the current device.

1. Purchase
2. Enroll
3. Configure and Secure
4. Maintain and Keep Updated
5. Retire and Replace

Secure, Control, Automate

Delivery specifications

• Navigate to www.miradore.com and click 'Get Started'.

• Provide your Company name, login name and password to create your EMM site.

• You may start to add smartphones and tablets immediately to the service and start securing, controlling and managing your mobile devices.

Requirements

• Miradore supports iOS, Android, and Windows Phone platforms.

• A network connection (mobile data, WiFi) must be available.
